Privacy Policy

AI4TEST — Downloaded on 2026/11/22

This policy explains what AI4TEST does with your personal data.

1. What we collect

- **Account data** — your name, username, email address and, on paid plans, billing details.
- **Usage data** — the projects, test runs and issues you create, and the tokens they consume.
- **Technical data** — IP address, browser and the log entries the service writes while it runs.

2. Why we collect it

We use your data to run the service, to bill you for it, to keep it secure, and to answer you when you contact support. We do not sell it.

3. Who we share it with

Only the processors the service runs on: our hosting and storage providers, the AI providers that generate and heal your tests, our payment providers, and our email delivery provider. Each of them is bound to use the data only on our instructions.

4. How long we keep it

Account data is kept while your account exists and for as long afterwards as accounting law requires. Test runs and their logs are kept according to your plan's retention period.

5. Your rights

You may ask us for a copy of your data, ask us to correct it, or ask us to delete it. Write to the address on our contact page and we will answer within 30 days.

6. Cookies

We set the cookies needed to keep you signed in and to remember your preferences. Anything beyond that is only set once you have agreed to it.
